Claim Objections

1. Claim 5 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. In this case, the term “set of supply generators according to claim 1”, recited in line 1, is not further limit according to claim 1 because claim 1 only claimed “supply generator”. Clarification or correction is needed.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 5-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 5, “set of supply generators”, recited in line 1, is indefinite because lack antecedent basis from preceding claim 1. Correction is needed.

In claim 6, “supply generators according to claim 1”, recited in lines 4-5, is indefinite because lacks antecedent basis from preceding claim 1. Correction is needed.

4. Claims 1-4 are allowed.

5. The following is a statement of reasons for the indication of allowable subject matter: the prior art of record does not show or suggest a first diode between a first

transistor of said pair and the supply of said generator and a second diode between the connection point of the inductor and the resonant capacitor and the connection point of said first transistor and said first diode as recited in claims 1-4.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Steigerwald (US 3,820,005) discloses an inverter with constant duty cycle control. Peters, JR. (US 3,898,410) discloses AC to RF converter circuit for induction cooking unit. Cornec (US 5,841,646) discloses a resonance inverter power supply control device.
